

GAF to WPI conversion chart.

California rates a psychiatric injury from the physician's **Global Assessment of Functioning** score: the 2005 schedule converts each GAF to a whole-person impairment. **GAF 70 or higher is no ratable impairment.** For injuries on or after January 1, 2013, the WPI is then multiplied by 1.4 (SB 863) before the occupational and age adjustments.

Reading a row. GAF 45 → **40% WPI** → [1.4]56 for a 2013+ injury; the impairment number is 14.01.00.00, and the occupational variant and age table take it from there to the final PD.

Compensability, separately. For injuries on or after January 1, 2013, Labor Code §4660.1(c) bars increased PD for a psychiatric disorder arising out of a compensable physical injury, with two exceptions: being a victim of a violent act (or direct exposure to a significant one) and catastrophic injury.
